Annex 4: Photos of food relief support provided to households & families displaced and affected floods	

1.0 EXECUTIVE SUMMARY

The project embarked on providing assisting victims of floods in Baringo County. The purpose of the project was address flood mitigations by supporting vulnerable community members negatively affected by the floods and the schools affected by the floods and provide support in terms of relocating and provision of building materials for erection of temporary structures. Therefore, the project was based on addressing key challenges and problems attributed to Lake Baringo flooding based on the following rationale;

a) Inadequate access to school facilities and amenities ;

Flooding had damaged school facilities. Part of the school infrastructures had been submerged in the lake due to flooding attributed to the rise in water levels in the lake due to climate change. Due to this situation, the schools had to be resited /relocated to higher ground provided by the community and the local administration hence the need for materials for reconstruction of the school infrastructure and amenities. The project supported the schools to address the emergency needs of infrastructure facilities to enhance learning in schools. Hence, the urgent need construction materials to construct classrooms and dormitories to enhance learning and access to school facilities. Urgent requirements for iron sheets to be used for construction of classrooms.

b)Inadequate access to food due flooding of farmlands for villages close to the Lake –The villages close to the lake had their land flooded with rising water from the lake forcing them to migrate to market centers on higher ground or seek shelter in neighboring villages thus creating a demand for emergency food provisions. Since the floods affected also schools, some schoolteachers and student were also supported with foodstuff to reduce hunger, ensure access to food supplies to schools affected by floods, and reduce dependency on handouts

c) Inadequate shelter due to submerged and destruction of houses caused by flooding menace & rising lake water levels hence making families live in the open fields and exposed to mosquitoes therefore prone to malaria outbreaks & other respiratory illness. Relocation of community members in flooded villages had to move to higher ground in neighboring villages hence requiring materials for reconstruction of houses.

d) Inadequate access to improved sanitation due to weak soil formations and submerged houses - Inadequate sanitation facilities have contributed to open defecation, which could attribute to increased diarrheal diseases hence the need to secure materials for construction of latrines that can address the sanitation needs of the displaced households.

The project has therefore supported 10no. Schools with construction materials (roofing materials) to construct classrooms and other key amenities i.e. dormitories to facilitate improved access to education facilities by-school children. Villages close to the lake displaced by the flooding menace supported with emergency Food relief support, which has benefitted 150no.families. Households in the targeted villages that had been flooded were involved in slabs casting for construction of latrines. 35no. households benefitted and have now improved access to improved sanitation facilities via SanPlat slabs hence reduction of open defecation. The project targeted schools and villages mostly affected by flooding in Baringo North and South sub counties. Improved access to shelter for the affected villagers whose houses had been submerged in the

Lake baringo flooding menace received construction materials i.e. roofing materials and now 30no. Households have now access to improved shelter after construction of their houses.

The report provides the progress and the impacts achieved through the support provided by HUMAN ACTIV. The project was granted US\$ 20,000(Kshs. 2,000,000) to initiate project implementation.

All the project target and indicators have been achieved and the project has improved community members' life and supported schools to have infrastructure leading to improved access to education among the children of poor afflicted communities. Improved sanitation for affected households has reduced the occurrence of diarrheal diseases. Provision of relief food supplies has stabilized families facing starvation and also provision of materials for house construction has reduced homelessness and affliction caused by inadequate shelter hence families being housed to enhance their stability in life.

We thank God for the support provided by HUMAN ACTIV for this noble funding for the project that alleviates human suffering by provision of foodstuff, shelter and improved sanitation in time of need.

2.0 SUPPORT TO SCHOOLS RECONSTRUCTION AND INFRASTRUCTURE IMPROVEMENT FOR SCHOOLS AFFECTED BY FLOODING

During the flooding period the schools next to Lake baringo had their building submerged in water hence they could not recover the property due to destruction by the lake water. Therefore, schools were forced to relocate to higher grounds after the local administration and the County government intervened. The school urgently required building materials to reconstruct classrooms, dormitories, latrines and other facilities i.e. Kitchen and staff room. Meetings were done with respective schools and agreed on the need for community participation to address the challenges.

The following are the schools and ECD centers supported by the project

- a) Lake Baringo Mixed Secondary School
- b) Loruk Day mixed secondary school
- c) Salabani Mixed Day secondary school
- d) Ngambo Girls Secondary school
- e) Salabani Primary school
- f) Eldume ECD Center
- g) Ngambo Primary School
- h) Moininin Primary school
- i) Chelelyo ECD Center
- j) Akorian ECD Center

The status of the schools supported by the project before and after project intervention

NAME OF SITE /SCHOOL	POPULATION				GPS		Situation Before	Support Provided
	Boys	Girls	Teachers	Totals	Northings/ Latitude	Eastings/ Longitude		
1. Lake Baringo Mixed Secondary School	110	106	14	230			<ul style="list-style-type: none"> a) School submerged in Lake but relocated b) Inadequate classrooms c) Inadequate dormitories 	<ul style="list-style-type: none"> a) Provided 140Dumu Zas iron sheets-3m size &20kg roofing nails b) Supported construction of Girls dormitories & Classroom
2. Salabani Mixed Day secondary school	39	54	6	99	0.521352	36.014114	<ul style="list-style-type: none"> a) School submerged in Lake but relocated b) Inadequate classrooms c) Inadequate office for staff 	Provided 70 Dumu Zas 3m sheets &10kg roofing nails for construction of staff room for school teachers
3. Salabani Primary School	214	227	10	451	0.613175	36.021579	<ul style="list-style-type: none"> a) School submerged in Lake but relocated b) Inadequate classrooms for lower classrooms 	Provided 70 Dumu Zas 3m sheets &10kg roofing nails for construction of 2no.Lower classrooms
4. Ngambo Girls Secondary school		50	9	59	0.516970	36.000461	<ul style="list-style-type: none"> a) School submerged in Lake but relocated b) Inadequate classrooms c) Inadequate laboratories 	Provided 70 Dumu Zas 3m sheets &10kg roofing nails for construction of school laboratories
5. Ngambo Primary School	188	155	12	355	0.495723	35.989651	<ul style="list-style-type: none"> a) School submerged in Lake but relocated b) Inadequate classrooms for lower classrooms 	Provided 70 Dumu Zas 3m sheets &10kg roofing nails for construction of 2no.Lower classrooms
6. Moinin Primary school	188	187	10	385	0.668657	36.013606	<ul style="list-style-type: none"> a) Inadequate classrooms for Early Child hood Education (ECD) 	Provided 70 Dumu Zas 3m sheets &10kg roofing nails for construction of 2no.classrooms for ECD children

7. Chelelyo ECD Center	30	20	5	55	0.715919	36.022617	Inadequate classrooms for Early Child hood Education(ECD)	Provided 70 Dumu Zas 3m sheets &10kg roofing nails for construction of 1no.classrooms for ECD children
8. Loruk Day mixed secondary school	10	16	4	30	0.715077	36.037997	a) School submerged in Lake but relocated b) Inadequate classrooms	Provided 70 Dumu Zas 3m sheets &10kg roofing nails for construction of 1no. classroom block
9. Eldume ECD Center	10	10	2	22			Inadequate classrooms for Early Child hood Education(ECD)	Provided 70 Dumu Zas 3m sheets &10kg roofing nails for construction of 1no.classrooms for ECD children
10. Akorian ECD Center	15	10	2	27			Inadequate classrooms for Early Child hood Education(ECD)	Provided 70 Dumu Zas 3m sheets &10kg roofing nails for construction of 1no.classrooms for ECD children

The target schools participated in undertaking the following activities to ensure the works are carried out on schedule

- a) Provision of superstructure materials –bricks, cement or used iron sheets
- b) Payment for skilled and unskilled labour
- c) Food for the artisans involved in construction

3.0 SUPPORT TO HOUSEHOLDS AFFECTED BY THE FLOODS & RISING WATER LEVELS FROM LAKE BARINGO TO CONSTRUCT HOUSES & SHELTER IMPROVEMENT

The floods from the lake baringo affected several villages close to the lake. Most of the houses were submerged in the lake with rising water levels from the lake destroying farmlands. The destruction affected the crops and livelihoods of the communities. Most of the villagers were exposed to wild animals that traverse the lake and land especially at night i.e. hippos, crocodiles and snakes. The damage created an emergency that the project intervened to assist the vulnerable community members.

Meetings were conducted in the affected villages to identify vulnerable community members especially the elderly, widows and persons with disability who could be supported with materials in their new relocation sites to construct houses. The purpose of this assistance is to provide stability and reduce incidences animal and human conflict. Also, secure affordable shelter to address basic needs of human being.

Through consultation with the various church elders, meetings were carried out in the target villages around the lake to agree on the criteria for assistance and the type of assistance they will receive from the project. The following is a list of vulnerable community members who received the support

3.1 List of Vulnerable Households that received materials for house Reconstruction-Houses had submerged in Lake due to flooding initial Phase in July, 2021

Name of household	ID/No.	Phone No.	Village	No. of Iron sheets provided
1. Paulina Yator	11848222	0728821286	Kapkirwok	20
2. Samuel Cherutich	4536154	0722438099	Soiyo	20

4.0 FOOD RELIEF SUPPORT TO HOUSEHOLDS AFFECTED BY THE FLOODS & RISING WATER LEVELS FROM LAKE BARINGO

The project provided foodstuff to vulnerable community members affected by the floods in various villages neighboring Lake Baringo. The purpose of providing foodstuff was to alleviate them from hunger since most of their land had been submerged in the lake therefore have no land for food production. A total 75no. Families received food supplies two times.

FOODSTUFF ITEM	QUANTITIES
a) Maize meal	6kg(3Packets)
b) Rice	2kg
c) Sugar	2kg
d) Wheat flour	2kg
e) Beans	2kg
f) Green grams	1kg
g) Cooking fat	2litres
h) Salt	200grams
i) Bar soap	2No Bars

LIST VULNERABLE HOUSE HOLDS & BENEFICIRIES OF FOOD PACKAGES DISTRIBUTION

5.0 SANITATION IMPROVEMENT SUPPORT TO VULNERABLE HOUSEHOLDS AFFECTED BY THE FLOODS & RISING WATER LEVELS OF LAKE BARINGO

Communities in affected villages were mobilized to contribute sand and ballast while the project provided cement and reinforcement bars for construction of the latrines. Each household received 1no. Sanitation slab for latrine construction and improvement. Casting of the slabs was done by the communities in the respective villages with assistance of skilled artisans.

Distribution of sanitation slabs developed in the respective villages

VILLAGES /AREA	NO. LATRINES IMPROVED
1. Salabani	6
2. Ngenyim	11
3. Loruk	10
4. Moinimimi	27
5. Kabikoki	6
Totals latrines constructed	60

6.0 KEY RECOMMENDATIONS AND WAY FORWARD

- a) That there is need to have a resilience and development program to address the shortcoming in the affected community to enhance community capacity to cope with the situation.**
- b) The future projects need to consider water and sanitation component to address the water and sanitation needs that is currently affecting the community due to flooding menace. Communities and households have no access to improved sanitation.**
- c) That the displaced communities will require sustainable livelihoods to cope with the adverse effects of hunger and poor incomes.**
- d) The national government and the County governments need to scale up their support to the vulnerable communities & households by addressing their needs. The communities have been abandoned with no adequate support.**
- e) The ministry of education need to support all the schools to secure additional infrastructure facilities in areas where the schools relocated to ensure continuity of school studies and adequate enrolment of students.**
- f) That the NGOs providing assistance need to develop network mechanism so that there is no duplication of efforts in terms of providing assistance. Need to have an integrated support program for both communities and schools.**
- g) Future engagement of the community need to focus on community participation to identify their appropriate needs assessment to enhance sustainable development and effective community management systems.**

ANNEX 1: PHOTOS FOR PROVISION, DISTRIBUTION & CONSTRUCTION OF HOUSES FOR VULNERABLE HOUSEHOLDS AFFECTED BY FLOODS

1. Distribution of roofing materials &nails to vulnerable households displaced by floods in Loruk and Monoini villages

2. Beneficiaries of reconstruction materials verifying the materials received before dispatching them to their respective house construction sites

3. Villagers in Salabani village displaced by the floods receiving hardware materials for house construction

4. Vulnerable household Ms Margaret Lenamada relocated due to floods with new houses supported by the project in Eldepes village

5. A vulnerable household & family affected the floods supported to construct a house in Salabani village

6. Vulnerable elderly man Chemuna Kamuren displaced due to floods supported with house reconstruction in Ngenyin village

7. Vulnerable household Pius Chelimo accessing a reconstructed house supported by the project in Ngenyin village

8. A vulnerable woman Ms. Grace Chelimo household in house reconstructed with project support in Ngenyin village

9. A completed reconstructed house with support of the project for vulnerable household in Ngenyin village

10. A house reconstructed with project for vulnerable household nearing completion in area around Lake Baringo-Ngenyin village

11. A vulnerable family Ms. Josephat Lenaso who relocated due to floods have been supported by the project to construct a house in Eldume village

11. A vulnerable household Ms. Grace Lonoo relocated due to floods with their house under construction with support from the project in Lospeken area of Eldume village

13. Vulnerable household Meshack Lebene who relocated due to floods next to his reconstructed house with support of the project

ANNEX 2: PHOTOS FOR SUPPORT RECONSTRUCTION OF SCHOOLS & EARLY CHILD HOOD CENTERS AFFECTED BY THE FLOODS

1. Loruk Day Secondary school building nearing completion –reconstruction supported by the project

2. Ngambo Girls School laboratory being completed –Reconstruction supported by the project after relocation

3. Ngambo Primary School classroom reconstructed after school relocation due to Lake Baringo floods

4. Ngambo primary school class in-use by pupils after reconstruction

5. Eldume ECD School after reconstruction

6. Eldume ECD School classroom in use

7. Monoinin Primary School ECD Center classroom reconstructed after relocation due to floods

8. Chelelyo ECD Center reconstructed by the Project school relocated due to floods

3.0 PHOTOS FOR SUPPORT AND IMPROVEMENT OF SANITATION FACILITIES FOR VULNERABLE HOUSEHOLDS AFFECTED BY THE FLOODS

1. SANPLAT Latrine slab being constructed for improved sanitation in relocated village for vulnerable villagers displaced by Lake Baringo floods

2. SANPLAT Slabs being manufactured for vulnerable community members households for improved sanitation

3. Preparing SANPLAT slabs for construction of improved latrines

4. Construction of the Households latrines in Salabani village

5. Preparing & manufacture of trapezoidal blocks for SANPLAT latrines lining for weak soil formation/flooded areas

6. Preparing circular SANPLAT slabs & taking measurements for household latrine construction

7. Rectangular SANPLAT latrine slab ready for household latrine construction
